

FOODMAX ACF-T

Product code: 264500801

Food grade conveyor fluid

This product is an advanced food grade lubricant specially formulated for lubricating conveyors. Blended from medicinal oils with selected additives that provides high resistant to oxidation and good demulsifying properties. It is fortified with additives and PTFE to provide anti-wear performance and tackiness to minimize oil drippings. It meets the strictest specifications of the food industry and fit perfectly in Hazard Analysis Critical Control Point (HACCP). The product also meets requirements specified in FDA 21 CFR 178.3570 "Lubricants in incidental contact with food".

Applications

The product is suitable for a wide range of conveyor systems in food processing applications.

It can be applied manually or through centralized lubrication systems, spraying, brushing, or dripping. It contains PTFE so it is important to STIR WELL before use.

Benefits & Advantages

- Excellent corrosion inhibitor
- Good wear protection
- Good load carrying properties
- Food grade approved
- Good lubricity
- Resistant to foaming

Typical Performance Data

Typical	Value
Appearance	White
Specific Gravity @ 25°C	0.85
Viscosity @ 40 °C, cSt	32
Flash point, °C	210
Pour point, °C	-18
ASTM D-665 B	Pass
4-balls wear test, 40kg 1200rpm 1h, mm	0.5
